

Pawar Public School, Nanded
May Vacation Homework (2020-21)

Subject: Science

Std-IX

Biology: Read about the process of vaccination from the lesson “Why do we fall ill?”. In the current circumstances many countries are trying to develop a vaccine for Covid-19. Find out various methods of vaccine development adopted by those countries and write a report about the same.

Chemistry: (Activity) Take some water at room temperature in a glass. Add a drop of ink into it. Take pictures of the glass at certain intervals (2min). Observe the colour changes and note them down. Repeat the same process with warm water and note down your observations. Finally, mention the changes you observed between the two experiments, and write down the reasons. Support your observations by photos in both the cases.
